

WE ARE EXPERTS IN STREETLIGHT UPGRADES

As experts in streetlight upgrades, our passion for delivering professional design-build streetlight solutions for our partners and clients, is driven by our commitment to provide unmatched service. *Professional installation 100% of the time.*

STREETLIGHT UPGRADE PROCESS

- **FEASIBILITY**

The first step in our process is performing a feasibility study so you can see the benefits of the project and identify whether the project is financially feasible and benefits your entity.

- **IGA**

Our second stage is to execute an Investment Grade Audit (IGA). The IGA determines where existing assets live and allows us to custom design a system that optimizes the most economic and visual benefits.

- **IMPLEMENTATION**

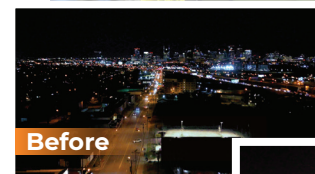

During implementation, we work alongside community stakeholders to manage all aspects of the project. From ideation, to engineering, to installation, your team rests easy knowing that SitelogIQ delivers.

- **COMMISSIONING**

You have trusted us with your project and we now get to deliver on our promises. SitelogIQ will measure and verify the energy savings delivered to your community, just like we have done many times before.

- **MAINTENANCE & WARRANTY**

We stand behind our work and, more importantly, we stand behind our clients. With SitelogIQ, you get service you can count on well after the project has been completed.

Before and
after of Nashville
streetlight retrofit

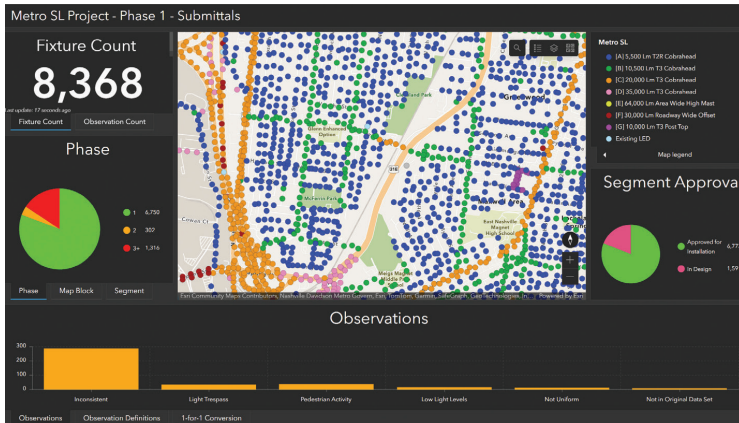

Our tailored solutions extend well beyond streetlighting retrofits

LED LIGHTING UPGRADES | HVAC & HVAC CONTROLS | BUILDING AUTOMATION | RENEWABLE ENERGY INTEGRATION

INFRASTRUCTURE SOLUTIONS. DELIVERED.

Making your community safer and more efficient is not an easy feat. As the go-to team for communities across the U.S., we are here to help guide you and your team on the path to delivering measurable solutions on your roadways. From start to finish, we are your partner. We listen to your needs and usher your project from ideation to completion.

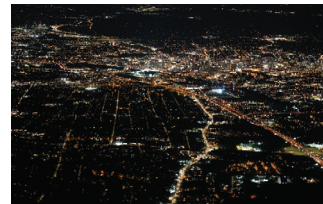

When you work with SitelogIQ, we handle the heavy lifting, including initiating investment grade audits, executing project planning and engineering, carrying out project management, and handling project commissioning. From small rural towns to America's largest cities, we continue to deliver over 100,000 streetlight retrofit solutions. We work with you and your teams to ensure seamless transitions, timely maintenance, and continued support.

HIGH MAST & HIGHWAYS

Maintaining Efficiency

With experience on interstates and highways, high traffic areas are no problem for our team.

URBAN & RURAL ROADS

Increasing Consistency

Our roadway lighting upgrades provide communities with comfortable, efficient lighting.

DECORATIVE FIXTURES

Beautifying Your Community

We work to add to your city's desired aesthetic through custom designed lighting solutions.

SAVINGS THROUGH TECHNOLOGY

Money isn't the only resource we help communities save. SitelogIQ can help get your team online with a wide array of technologies to provide efficient solutions for grid management.

SitelogIQ and their team of partner organizations have worked diligently to maximize the benefits of this project to the City of Columbia. Their understanding of existing streetlight structures and agreements both from the perspectives of the municipalities and from the utilities that serve them was greatly beneficial during initial conversations with our local utility company, Columbia Power & Water Systems.
