

SOLAR INCENTIVES FOR HIGH ENERGY FACILITIES

Organizations that rely heavily on energy have the opportunity to turn solar into savings. Right now, available federal and state incentives can cover up to 100% or more of solar project costs, dramatically reducing the financial barrier to getting started. These programs won't be around forever, so acting now means locking in savings, cutting utility bills, and moving your business toward a more sustainable future.

STACK SOLAR INCENTIVES, MAXIMIZE SAVINGS

- ✔ Businesses can tap into federal solar incentives through the Investment Tax Credit (ITC). The ITC alone covers **30–50%** of a project, and with first-year bonus depreciation, the total benefit can be between **51–71%**.
- ✔ On top of that, states like **California, Illinois, Massachusetts, and New Jersey** layer in their own programs, often pushing the total value to cover the entire project or more.

These credits won't stay this strong forever, and once they change, the savings shrink.

ILLINOIS

84-115% Coverage

Solar Renewable Energy Credits (SRECs) of 15–20% over 15 yrs, Smart Inverter incentive, state depreciation

CALIFORNIA

63-90% plus ongoing energy savings

High solar production, state credits & depreciation, SGIP battery rebates up to \$900/kWh

MASSACHUSETTS

99-159% Coverage

SRECs of 40–80% over 10 yrs, state depreciation, high energy prices

NEW JERSEY

100-160% Coverage

SRECs of 40–80% over 15 yrs, state depreciation, strong demand & visibility

About SitologIQ

SitologIQ Commercial Markets helps organizations tackle multi-measure energy efficiency, electrification, and renewable solutions. We provide a better way to plan, install, and report on the success of dealership upgrade projects.

We're your one partner that supports all project steps. **One partner, one source of accountability, one comprehensive strategy—across all of your organization's properties or facilities.**

50+ SitologIQ has deployed **MEGAWATTS** of solar capacity to date.

“ ”

SitologIQ strengthens our energy efficiency strategy by helping us identify all available energy efficiency opportunities within our portfolio, so we're never leaving money on the table.

John Forde, Resource Manager
Essex Property Trust

Your One-Stop Partner for Solar Projects

SitologIQ Commercial Markets is your consultant, contractor, and strategic partner to rapidly transition from concept to tangible results. We're your one-stop partner to design and deliver strategic, measurable solar programs to your organization's operations, simplifying the process, lowering energy costs, maximizing incentives, and strengthening long-term sustainability goals.

We handle all steps of solar PV projects, including identifying, applying for, and managing federal and state incentives on your behalf.

ASSESS

- Site Prioritization
- Concept Design
- Rapid Budgeting
- Capacity Calculations

DESIGN

- Property Audits
- Permitting/Design/Engineering
- Product Agnostic
- Firm Pricing

BUILD

- Turnkey Execution
- Utility Coordination
- In-House Labor
- Program Management

VERIFY

- Commissioning
- Operations & Maintenance Training
- Warranty Management
